(Max)imilian Puelma Touzel, Canadian/Chilean citizen

contact: puelmatm@mila.quebec web: mptouzel.github.io

Mila, #200, 6666 rue St. Urbain, Montreal, Quebec H2S 3H1, Canada

Languages spoken: ***English*** (native), ***Spanish*** (fluent), ***French*** (intermediate), ***German*** (intermediate)

Education

2011-2015 **PhD – Physics**
Physics of Biological and Complex Systems (International Max Planck Research School)
University of Goettingen, Germany
Dissertation: *Cellular dynamics and stable chaos in balanced networks* (link)
Committee: Fred Wolf, Robert Guetig, Joerg Enderlein

2008-2009 **Master of Science – Physics**
Department of Physics, University of Toronto, Canada

2001-2006 **Honours Bachelor of Science – Mathematics & Physics (Double Specialist)**
Department of Physics, University of Toronto, Canada

Research Experience

2020-present **Research Associate – funded by CERC on Autonomous AI** Montréal, Canada
Mila*, Université de Montréal*
- Multi-agent/Continual reinforcement learning
- Public opinion research/Computational social science (NLP applications, e.g. topic modelling)

2018-2020 **Post-Doctoral Fellow - IVADO PDF award** Montréal, Canada
Mila*, Université de Montréal*
Advisors: Yoshua Bengio & Guillaume Lajoie
- Improving training for recurrent neural network models using dynamical systems
- Reinforcement learning models/neural implementations of human and primate decision-making

2015-2018 **Post-Doctoral Fellow - ERC-funded** Paris, France
Laboratoire de physique théorique*, Ecole Normale Supérieure*
Advisors: Aleksandra Walczak & Thierry Mora
- statistical inference of probabilistic models of genetic recombination and selection processes
- model-based inference of repertoire dynamics using high-throughput sequencing

2010-2015 **Doctoral Researcher - IMPRS Excellence stipend award** Goettingen, Germany
Theoretical Neurophysics Group*, Max Planck Institute for Dynamics and Self-Organization*
Advisor: Fred Wolf
- statistical physics of cortical circuit attractor dynamics, response theory for neural ensembles, neural classifiers for sequence discrimination

2009-2010 **Master's Researcher** Toronto, Canada
Systems Biophysics Lab, *Department of Physics, University of Toronto*
Advisor: William Ryu
- thermotaxis assay development and imaging experiments for *C. elegans*

2004-2005 **Undergraduate Researcher** Toronto, Canada
Centre for Quantum Information and Quantum Control, *University of Toronto*
Advisor: Aephraim Steinberg
- optimal measurement theory in quantum state discrimination

Scholary Awards & Grants

2021 **FRQNT Team grant award** (co-written; 180k/3 years)
2019 **Montreal AI & Neuroscience conference Poster Award**
2018 **IVADO Post-doctoral fellowship award** ($140k over 2 years)
2015 **Sloan-Swartz Travel Fellowship** (1 of 2)
Swartz Foundation Meeting 2015, HHMI Janelia Farms
2014 **Summer School Start-up Program grant** (€20k)
University of Goettingen (principal writer and coordinator)
2012 **ACCN Award (sole recipient,** €2k)
Advanced Course in Computational Neuroscience, Organization for Computational Neuroscience
2012 **CNS 2012 Conference Poster Award**
2011 **Excellence Fellowship, IMPRS PhD** (2 yrs.)
International Max Planck Research School *Physics of Biological and Complex Systems*
2009 **Travel grant, Neural Dynamics Summer School**
MITACS (Mathematics of Information Technology and Complex Systems)
2001 **90th Percentile**, Leonardo da Vinci Competition
Faculty of Applied Science and Engineering, University of Toronto

Society membership, Institutional/Research community service

- DBIO member, **American Physical Society**
- Reviewer, **Physical Review X** (Editor's remark: "You clearly put a lot of effort in thinking about the paper and preparing your review. Your help is much appreciated.")
- Reviewer, **COSYNE, NeurIPS**
- Member, **Society for Computational Neuroscience**,
- DPMB member, **Canadian Association of Physicists**
- W2 Professorship hiring committee, **Max Planck Institute for Dynamics and Self-Organization** (2015)
- Board member (Student Representative), **Institute of Nonlinear Dynamics**, Goettingen, Germany (2014-2015)

Organization of Science Conferences, Workshops, Schools, Reading Groups, Courses

2022 **Workshop Co-organizer** Providence, USA
Social alignment in humans and machines

2021 **Symposium Co-organizer** Montréal, Canada
Symposium on Explanation in Neuroscience & Artificial Intelligence (SENAI)

2020-2022 **Reading group Co-organizer** Montréal, Canada
Mila NeuroAI reading group

2020 **Discussion session facilitator** Montréal, Canada
Higher-order cognition *session (UNIQUE Student Symposium 2020)*

2019 **Workshop co-organizer** Montréal, Canada
Real neurons & hidden units Workshop (NeurIPS NeuroAI Workshop)
Comprehensive 1-day event, e.g. >50 double-blind review processed papers, live video feed, panel, etc.

Workshop group discussion activity organizer Toronto, Canada
Mathematics of Vision Workshop, Fields Institute

Conference co-organizer Montréal, Canada
Montreal Physics and AI Workshop
>200 participants, lectures, and beginner and advanced workshops

2017 **Symposium co-organizer** Paris, France
- *Paris Biological Physics Community Day*

2012-2015 **Summer school lead organizer** Goettingen, Germany
Goettingen Advanced Course in Computational Neuroscience
- Managed team, facilitated the event.

Initiated, acquired funding for, and oversaw a transition to a novel, advanced-content format

2011-2015 **Course co-coordinator/content manager** Goettingen, Germany
- Seminar in Biophysics, Seminar in Theoretical Neuroscience

2014 **Summer school co-coordinator (Week 2: Network Neurodynamics)** Valparaiso, Chile
Latin American Summer School in Computational Neuroscience held at Instituto de Sistemas Complejos Valparaiso

Selected Talks

2022 **(Invited) BIRS Workshop on Dynamical Principles of Bio. & Artificial Neural Nets** Banff, Canada
2021 **Neural Scaling Laws Workshop** Tremblant, Canada
2021 **Reinforcement learning Reading Group (Mila)** Virtual
2020 **Ross Otto Lab (McGill Psychology)** Virtual

Urgency as the opportunity cost of time
Neural AI Reading Group (Mila) Montreal, Canada
Inverse Rational Control

2019 ***Soft Matter & Biophysics Seminar*, Simon Fraser University** (invited) Vancouver, Canada
An inference take on urgency in decision-making
***Computational Neuroscience Seminar*, University of Ottawa** (invited) Ottawa, Canada
An inference take on urgency in decision-making
***Quantitative & Computational Biology Seminar*, UdeM** (invited) Montreal, Canada
Inferring repertoire dynamics from repertoire sequencing

2018 ***Spotlight talk*, Rice University, q-bio Conference** Houston, USA
Ensemble response of immune repertoires to vaccination

2018 ***Friday seminar,* UCL, Gatsby Theoretical Neuroscience Unit** (invited) London, UK
Understanding the shape of high-dimensional activity in cortex-inspired neural circuits
***Biophysics seminar*, Emory University, Dept. Physics** (invited) Atlanta, USA
APS March Meeting Los Angeles, USA
Repertoire-based approach to identifying sequence motifs specific to an effective vaccine
***Biophysics seminar*, McGill University, Dept. Physics** (invited) Montréal, Canada
Inferring contributions of recombination and selection to singly-perturbed repertoires
***Tea talk*, Montreal Institute for Learning Algorithms** (invited) Montréal, Canada
Don't paint the box black: Using dynamical systems to explain complex phase space geometry

2017 ***Systems Immunology and Vaccine Design Workshop*** Heidelberg, Germany
Repertoire-based approach to identifying sequence motifs specific to an effective vaccine
***Biophysics Seminar,* U of T Dept. Physics** Toronto, Canada
Inferring contributions of recombination and selection to singly-perturbed repertoires

2016 ***PhD & PostDoc Seminar,* ENS Dept. Physics** Paris, France
The statistical mechanics of phase space partitioning in large scale neuronal circuits

2015 ***Swartz Foundation Meeting*** Janelia Research Campus, USA
A theory for the balanced state that keeps track of each and every spike
***Neuronal Circuits and Computations Group Seminar,* Friedrich Miescher Institute** Basel, Switzerland
A theory of precise spike timing in cortical circuits
American Physical Society March Meeting San Antonio, USA

2015 Elements of a finite-size ergodic theory for stable chaos
ENS Theoretical Neuroscience Seminar Paris, France
A theory of precise spike timing in cortical circuits

2014 ***American Physical Society March Meeting*** Denver, USA
Microstate description of stable chaos in networks of spiking neurons
***Tutorial Lecture*, Summer School in Computational Neuroscience** Valparaiso, Chile
Theory and modelling methodology in biophysics through case studies in computational neuroscience

Selected Poster Presentations

2022 ***NeurIPS 2022 Workshop on Tackling Climate Change with Machine Learning*** Virtual
2022 ***Montreal AI Symposium*** Montreal, Canada
2022 ***RLDM*** Rhode Island, USA
2022 ***COSYNE*** Lisbon, Portugal
2021 ***NeurIPS EcoRL Workshop*** Virtual
2021 ***MAIS*** Virtual
2021 ***COSYNE*** Virtual
Urgency as the opportunity cost of commitment
2020 ***Biological and Artificial Reinforcement Learning Workshop NeurIPS*** Virtual
Urgency as the opportunity cost of commitment
2020 ***Neuroscience and Artificial Intelligent Systems (Cold Spring Harbor Labs)*** Virtual
Urgency as the opportunity cost of commitment

2020 ***COSYNE*** Denver, USA
An inference perspective on urgency in decision-making

2019 ***Montréal AI & Neuroscience Conference*** (***Poster Prize Winner***) Montréal, Canada
An inference take on urgency in decision-making

2019 ***Physics & AI Workshop*** Montréal, Canada
Stochastic thermodynamics of aggregate-label learning

2018 ***Montréal AI & Neuroscience Conference*** Montréal, Canada
Transfer properties of multi-spike tempotrons

q-bio Conference Houston, USA
Ensemble response of immune repertoires to vaccination

Curie-Weizmann Meeting Paris, France
Inferring perturbations to immune repertoires using clone size statistics

2017 ***Beg Rohu Summer School on Statistical Physics*** Beg Rohu, France
Inferring perturbations to immune repertoire dynamics

2016 ***Statistical physics methods in biology and computer science*** Paris, France
Antibody repertoires in fish

2016 ***Dynamics and Information in Cells and Tissues Workshop*** Les Houches, France
Inferring antibody generation: VDJ recombination in multiply infected fish

2015 ***International Conference in Mathematical Neuroscience*** Antibes, France
How entropy-producing networks can have precise spike times

2015 ***COSYNE*** Salt Lake City, USA
How entropy-producing networks can have precise spike times

2014 ***Bernstein Conference*** Goettingen, Germany
Stable chaos in balanced networks of spiking neurons with synaptic filtering

2013 ***German Neuroscience Society*** Goettingen, Germany
Instability and partial synchrony in a balanced network of resonator neurons

COSYNE Salt Lake City, USA
Controlling the trade-off between categorization and separation via resonance

Bernstein Conference Tuebingen, Germany
Microstate description of stable chaos in balanced spiking networks

Computational Neuroscience Society meeting Paris, France
Olfactory bulb network dynamics as a pattern reservoir for adaptive cortical representations

Mathematical Challenges in Neural Network Dynamics Columbus, USA
Stability properties of a balanced network of Type II neuronal oscillators

2012 ***Bernstein Conference*** Munich, Germany
Analyzing chaotic activity in a balanced network of Type II neuronal oscillators

Computational Neuroscience Society meeting (***Poster Prize Winner***) Decatur, USA
Features of Chaotic Activity in a balanced network of Type II neuronal oscillators

2007 ***International Conference on Quantum Information*** Rochester, U.S.A.
Optimal bounded-error strategies for projective measurements in non-orthogonal state discrimination

2006 ***Conference on Quantum Information and Quantum Control*** Toronto, Ontario
Non-orthogonal state discrimination in the presence of error using projective strategies

Participation in Summer Schools

2017 ***Beg Rohu Summer School on Statistical Physics*** Beg Rohu, France
Out of Equilibrium Dynamics, Evolution and Genetics

Cargese Summer School *Theoretical Biophysics* Cargese, France

2016 ***Course on Multiscale Integration in Biological Systems,*** Curie Institute Paris, France
Physical description of biological systems, from single molecule to organisms

L'Ecole de Physique des Houches Les Houches, France
Dynamics and Information in Cells and Tissues

Kavli Institute for Theoretical Physics Santa Barbara, USA
Quantitative Immunology

2015	***Kavli Institute for Theoretical Physics***	Santa Barbara, USA
	Olfaction	
2014	***Latin American Summer School in Computational Neuroscience***	Valparaiso, Chile
2013	***Mathematical Biosciences Institute***	Columbus, USA
	Mathematical Challenges in Neural Network Dynamics	
2012	***Computational Neuroscience Society***	Bedlewo, Poland
	Advanced Course in Computational Neuroscience (ACCN)	
2009	***Latin American Summer School in Computational Neuroscience***	Valparaiso, Chile
	Center for Neural Dynamics	Ottawa, Canada
	Computational Neuroscience Summer School	
2008	***Instituto de Sistemas Complejos***	Valparaiso, Chile
	Complex Systems Summer School	
	Universidad de Chile	Santiago, Chile
	Mathematical Modeling of Biological Systems using Matlab	
2007	***Institute of Physics***	Manchester, England
	Conference and Training Course in Emergent Themes in Biophysics	

Teaching/Supervision Experience

2020-present	Graduate-level dynamical systems lectures (substitute lecturer)	Montreal, Canada
2020-present	2 PhD students co-supervision (with Dr. Irina Rish)	Montreal, Canada
2021-present	2 PhD student co-supervision (with Guillaume Lajoie)	Montreal, Canada
2019	Physics and AI Workshop tutor	Montreal, Canada
2018	Master's student supervision (with Drs. Aleks Walczak & Thierry Mora)	Paris, France
2015	Master's student supervision (with Dr. Fred Wolf)	Goettingen, Germany
2014	Summer school tutor	Valparaiso, Chile
	• Supervised group projects	
	• Lectured on modelling methodology in neuroscience	
2012-2015	Summer school group work tutor	Goettingen, Germany
	Goettingen School for Computational Neuroscience,	
	Latin American Summer School in Computational Neuroscience	
	• Group work supervision; designed and implemented literature review activity	
2008-2009	Teaching assistant	Toronto, Canada
	Department of Physics, *University of Toronto*	
	• designed and delivered inquiry-based tutorials.	
2006-2007	Science educator and content programmer	Toronto, Canada
	Ontario Science Centre	
	• developed and performed demonstrations on astronomy, robotics, and resonance	
2006	Science camp co-ordinator	Toronto, Canada
	Activity Science Camp With Hispanic Youth	
	• conceived, designed, and implemented activity-focused summer science camp for at-risk youth supported by the *Centre for Spanish-Speaking People*	
2005	Professional academic tutor	Toronto, Canada
	• academic (math & science) and language support to newly immigrated youth	

Communications Experience

- **Scientific writing and editing**:
  - 2 years professional manuscript and thesis editing for Max Planck Institute (MPIDS)
  - Scientific Advisory Board Report editing 2016, Max Planck Institute for Dynamics and Self-Organization
  - Successful grant/fellowship-writing
- **Effective communication**: completed graduate-level course, *Effective Communication for Physicists*
- **Public-speaking/Event facilitation**: theatre; television interview; conference chair; summer school facilitator
- **Science communication**: talks; course/camp/school teaching; public science center communicator

Computational Skills

- High-performance computing experience:
  - Regular use of >100 cores for distributed calculations on MPIDS 10,000 core cluster (2012-2015).
  - Use of ENS physics cluster multi-threaded program on 48 core machine (2015-2018)
  - Active cloud computing, *Compute Canada* user (2019-present)
- Multi-language proficient (python, matlab, mathematica, some C++).
- Extensive version control and notebook-based prototyping
- **Data science/machine learning software stack (python: scipy, scikit-learn, PyTorch, pandas, etc.)**

Selected Outreach/Media

2021	**Mila blog article,** Recap of NeuroAI reading group	Montreal, Canada
2019	**ELife Ambassador**	Montreal, Canada
	• Contributor to the Statistical Literacy Initiative	
2011	**History of science journal article**	Goettingen, Germany
	"*Joseph Rotblat is Dead: Who will Save the World Now?*", *Peace* magazine vol.24 iss.1	
2007	**Canadian Broadcasting Company live on-set, on-air interview**	Toronto, Canada
